ADVANTAGES OF METAL STORAGE SPACE SYSTEMS.

Metal storage systems offer many advantages over a wooden house. They are not combustible and do not warp. Thanks to the hot-galvanized sheet steel, they are low-maintenance and resistant to both weather and mould. The steel used consists of 25% recycled material.

The tool sheds, firewood racks and garden boxes are 100% reusable. Another benefit is the convenient clear passage height of almost 2 metres, which makes it easier to enter and is higher than comparable tool sheds from other manufacturers.

LONG LASTING. GUARANTEED.

All major storage space system components are developed and manufactured by Hörmann. Endurance tests under real conditions ensure mature series products with Hörmann quality. Thanks to this, and uncompromising quality assurance, you receive a 20 year warranty on all Juno garden boxes, Berry tool sheds and Berry firewood racks from Hörmann.

CERTIFIED SAFETY FOR YOU AND YOUR FAMILY.

Hörmann storage space systems offer the highest quality and safety. To achieve this, all Berry tool sheds and Berry firewood racks are made of hot-galvanized sheet steel. Without any sharp edges and with high-quality doors, locks and hinges. This provides you and your family with safety during daily use.

Berry Apex Classic

Berry Pent Classic

Berry Pent Modern

ROBUST CONSTRUCTION.

The high stability of the storage space systems is achieved by a robust steel frame construction. Strong material thicknesses of up to 1.5 mm are used for optimum safety and long-lasting quality. All bolts and hinges are galvanized and thus protected against oxidation. The tool sheds are equipped with reliable door locks and high-quality hinges as standard. The standard profile cylinder in the locking system ensures that you can also store valuables, such as your e-bike, safely and securely.

Juno Apex Design

MADE FOR ALL KINDS OF WEATHER.

With the door closed and fixed to the foundation, Hörmann tool sheds can withstand wind speeds of up to 150 km/h and a snow load of 150 kg/m².

MADE TO THINK AND ACT GREEN.

Hörmann residential constructions are CO₂-neutral as standard offering sustained responsibility to future generations. Hörmann work with ClimatePartner to off-set the remaining emissions emissions by supporting
